

## Marvel studio releases its sequel on its popular Deadpool movie.

A new genre of super movie breaks the fourth wall.

**Stony Brook, NY – April 20, 2016.** For die-hard fans, Deadpool is a familiar name, ever since the first Deadpool movie came out, fans are craving for the second sequel of this popular comic character.

Marvel Entertainment just releases its preview and trailer for its upcoming Deadpool sequel which is coming soon to theaters in 2018. A different type of super hero movie Deadpool is, the original Deadpool 1 receives numerous supports and applauses since it was released in theater May 10, 2016. Abandon the normal super hero stereotype, Deadpool movies continue to catch audiences' attention with its comedy super hero portrayal.

A mercenary, Wade Wilson was a married man with a beautiful wife, but things changed when he was injured in a mission and forced to join the Weapon X Program, in the experimentation of human weapons, test subject placing bets in a "deadpool" as for how long each test subject would live. Wade escaped, and took the name Deadpool, and becomes the most attracting superhero the Marvel Universe has ever provided.

After the phenomenal success Ryan Reynold starring Fox film Deadpool 1, which became the most successful installment of the X-men franchise, the world is ready for another R-rated, action comedy movie with Marvel style. Considered the first super hero movie to break the fourth wall (an old convention of films that there is a wall between the actors and the audience), Deadpool 2 is continuing its action-packed style while interacting with the audiences.

"I think Deadpool 2 will comment on anything that's happening in movies today especially in superhero movies," producer Simon Kinberg says. "The sort of glut or saturation of these movies and the proliferation of sequels is definitely something we'll play around with."

Thanks to the prequel's huge success, we will be able to watch Deadpool on the big screen for the second time. Report of some Wolverine cameo and crossovers from other X-men are apparently speculated.

"Marvel Entertainment, LLC, founded in 1998, is a wholly-owned subsidiary of The Walt Disney Company.
